

MEMORANDUM OF AGREEMENT KAILUA WATERWAYS IMPROVEMENT PROGRAM

Tetra Tech EM Inc. (Tetra Tech) has implemented the Kailua Waterways Improvement Program (KWIP), under contract with the Kailua Bay Advisory Council (KBAC). The mission of the KWIP is to develop a community-based strategic implementation plan (SIP) to improve water quality in Kailua waterways. The SIP will describe water quality problems in the Kailua waterways system, identify appropriate remedial measures, and outline a strategy for implementing the most feasible measures that will result in the greatest improvement in water quality.

The successful development of the SIP will best be accomplished by a joint effort between Tetra Tech and the Advisory-Stakeholder Group (ASG). By signing this MOA, we agree to participate in the development of the SIP, focusing on improving water quality for the *entire* Kailua waterways system. We recognize that our respective responsibilities include the following:

Tetra Tech Responsibilities

- Involve the community and stakeholders connected with Kailua waterways system.
- Establish the ASG and perform trainings and site visits.
- Analyze data and rank water quality issues as identified in previous reports, site walks, and stakeholder input.
- Research and recommend appropriate and relevant remedial measures to address water quality issues.
- Conduct outreach to additional stakeholders that may have statutory responsibility or interest based on identification of remedial alternatives.
- Rank and prioritize water quality issues and appropriate remedial measures.
- Compile results of research into the Kailua waterways system proposed SIP
- Present the proposed SIP to the public.

Jason Brodersen, Project Manager
Tetra Tech EM Inc.

Leslie Kahihikolo, Technical Support
Tetra Tech EM Inc.

Advisory-Stakeholder Group Member Responsibilities

- Participate in working groups, trainings, and site visits.
- Assist in the ranking of water quality issues as identified in previous reports, site walks, and stakeholder input.
- Assist in identifying and prioritizing appropriate and relevant remedial measures to address water quality issues.
- Provide feedback in the production of the Kailua waterways system proposed SIP
